

**ADVIES VAN HET INSTITUUT VOOR NATUURBEHOUD A/2004.41**

**Responses to the report on the validation of Natura 2000 sites Belgium  
for the Flemish sites.**

Nummer : IN.A.2004.41  
Datum : 18 maart 2004  
Datum aanvraag : 19.02.2004  
Auteurs: Anny Anselin,  
Vragen naar : Valérie Goethals, valerie.goethals@instnat.be  
Aanvrager : Els Martens, Afdeling Natuur voor T. De Leus voor EU Directie ENV.B2  
Referentie: document IN/954/EM

Responses to the report on the validation of Natura 2000 sites Belgium for the Flemish sites.

**SPA Sites Flanders:**

Shapefile vglr0170.shp

- The Natura 2000 sitecodes in a correct format has been added to the table in a new column.
- This code corresponds to the ones given to the sites in the descriptive database.(see attached file)
- The corrected shapfile is added with a new name: vglr0107gebcode.zip (see attached)

**pSCI sites Flanders, Atlantic**

Shapefile hbtr0107atl.shp

- The proposed centroid latitude and longitude will be corrected in the descriptive database.

**Projection Parameters**

The projection parameters are as assumed by the evaluators: standard Lambert 72 Belgian projection.

**Site type problems**

The data for Flanders have been entered for the 23 SPA sites since June 2003. However, as the database will be a combined version for Belgium and this adapted updated version has not yet been send to the Commission, the evaluators could not know this. (see also comments from Marc Dufréne, Wallonia).
